Why SpaceVantage?

The future of Europe's space economy depends on people. SpaceVantage helps bridge the gap between Academy and Industry by developing the skills needed for emerging careers in:

Earth Observation
Satellite Navigation (GNSS)
Space Applications
Artificial Intelligence & Digital Technologies
Green Skills & Sustainability

A stronger cooperation between Education and Business

Aiming at a more inclusive European Space Ecosystem thanks to the design of a new benchmark skills framework:

Innovative curricula
Industry-driven learning
Micro-credentials
Entrepreneurship opportunities
